

## Open Data for Smart Mobility

Panel 4	Connected by Data: New Modes of Transport competing for the City
Talk	Provide and Visualize Prediction AI-based Public Transport Usage Data
Speaker	Marc Lammerding, Brodtmann Consulting, mFund Project "NV-ProVi"

*“With public transport data,  
traditional statistics will not get you  
where you want to be.”*

mFund Project

NV-ProVi

Project Partners

Brodtmann Consulting  
Stadtwerke Gießen  
RMV (associated)

Timeline

March 2020  
September 2022

## The process so far

- First static data in 2019
- APIs to receive data & automated routines to process data
- Statistical analysis
- Filters to manipulate underlying data and visualizations that highlight connections
- Significantly improvements
  - punctuality
  - fit to demand
  - financial impact
  - ...

## mFund Project NV-ProVi

### Project goals

- Set up real-time data stream
- Develop precise forecasting algorithms for occupancy and delays
- Provide real-time forecasting / simulation functionality
- Visualize results for public transport clients

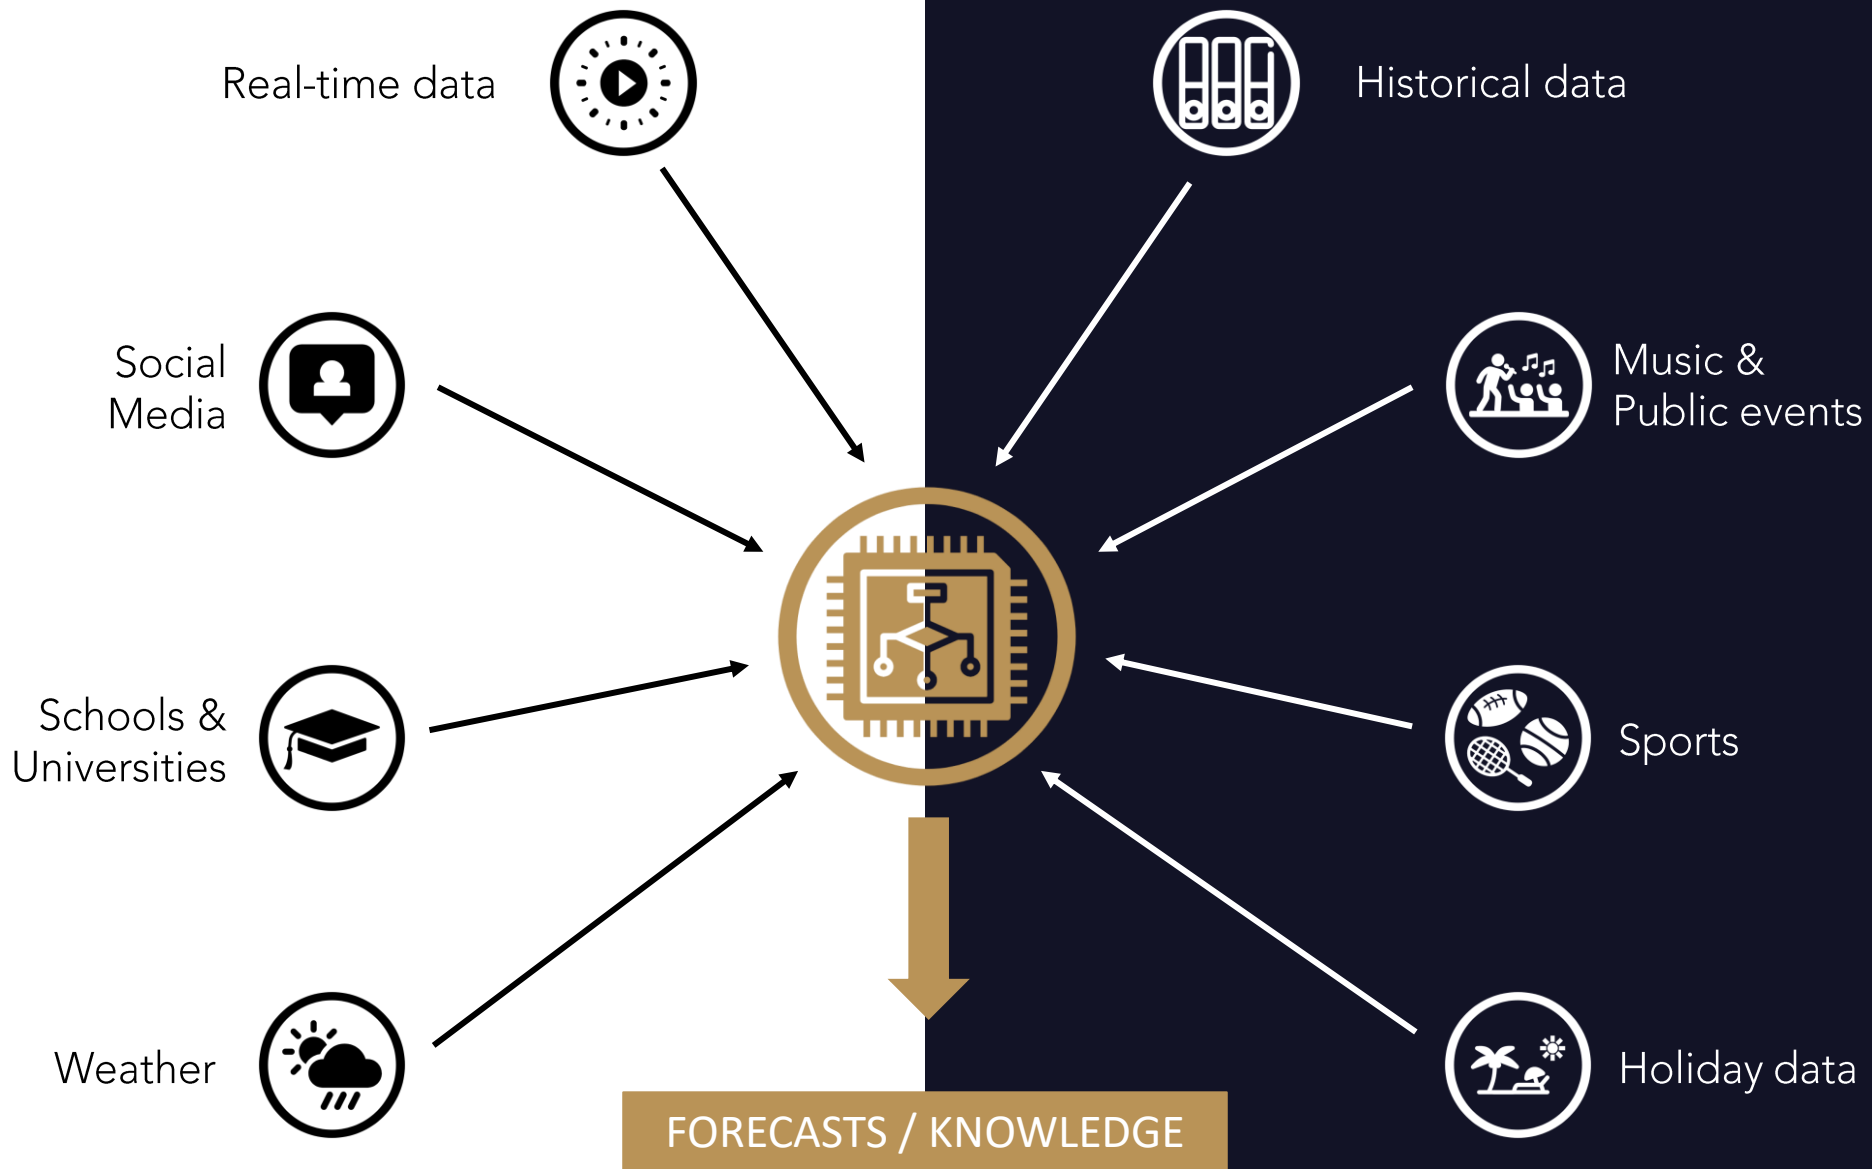

Real-time data

Historical data

FORECASTS / KNOWLEDGE

Infrastructure /  
Technology

AWS / Microservices

Data Ingress

Forecasting  
Methodology

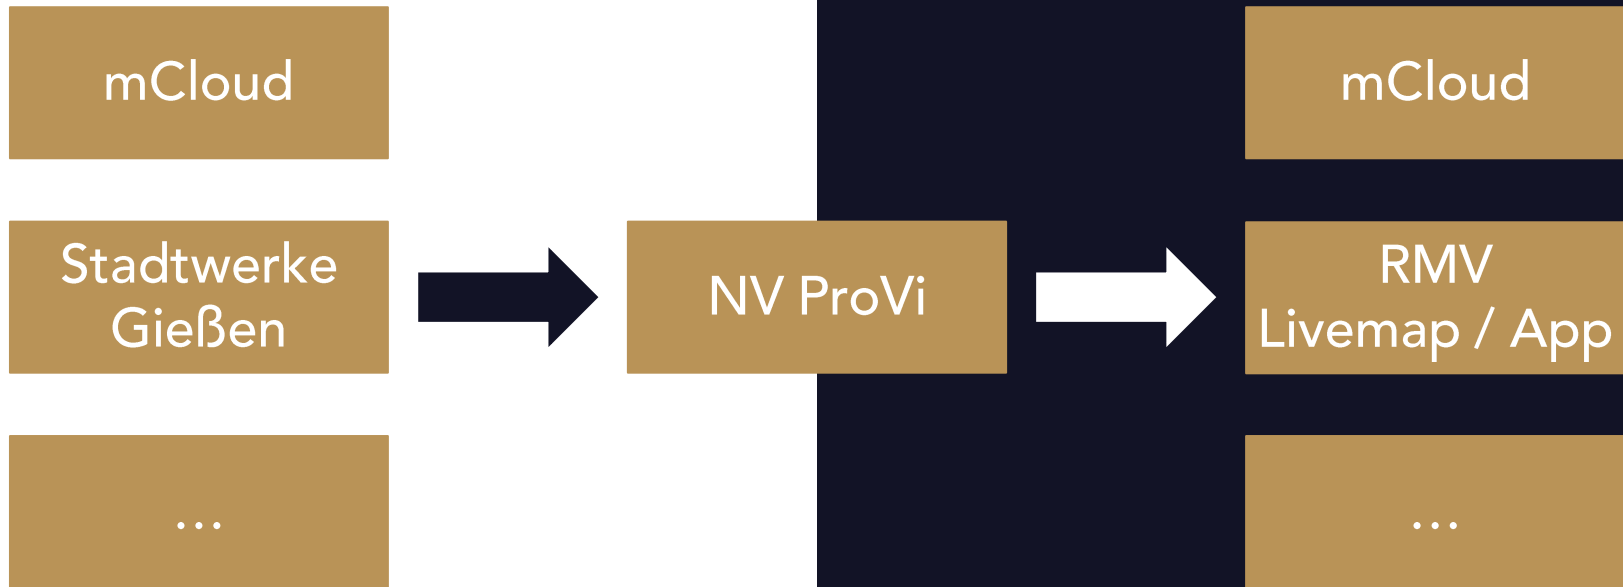

Test different strategies

Standardized  
formats / APIs

Data Egress

Visualization

RMV mobile app / Live Map

- EU-managed, centralized open data platform for real-time data that projects like ours can access and share data on?

- How can we make sure that the huge amounts of data that is being generated can be stored efficiently and is relevant?

Thank you for your time!
